Conventional Methods - Conventional Approaches - Models of the Universe are described and classified into three major categories: Historic, Expanding, and Cellular. It is shown that all expanding universe models violate the cosmic edge and containment principle. The multi-millennium conflict between the two major world views --the changing dynamic universe and the unchanging stable universe-- is highlighted. Thu, 06 Dec 2018 18:46:00 GMT
Models of the Universe - Cellular Universe - Two tiny pieces of glass in the hands of a scientist {an eyepiece and objective lens of a Galilean telescope and a book describing his experimental results} forever changed our relationship to the physical and spiritual world, to our ethics-- to our moral principles.
